Security Program Manager

DXC Technology - April 2017 to November 2020

The security program manager is responsible for all program management tasks. He is expected to define the standards, tools and governance required to effectively manage and control the security program. The person filling this role leads the program team, assigns tasks, monitors deliverables and schedules, and interfaces with other groups as needed. He or she also provides direction to the projects in the program and ensures that they meet all scope, time, budget and quality expectations.

Security Program Manager

HP - January 2014 to March 2017 - Grenoble - France

The security program manager is responsible for all program management tasks. He is expected to define the standards, tools and governance required to effectively manage and control the security program. The person filling this role leads the program team, assigns tasks, monitors deliverables and schedules, and interfaces with other groups as needed. He or she also provides direction to the projects in the program and ensures that they meet all scope, time, budget and quality expectations.
